

2023-2024

Catalogue

Preface

Dear Customer

We proudly present our new catalogue to you. That is right, MVS In Motion is in a new jacket! Together, we will unwrap our new branding for the coming years on Medica Trade Fair 2023. This move follows the further growth to professionalism and will help us to enlarge our brand awareness in the world of physiotherapy and rehabilitation.

The birth of this new catalogue goes hand in hand with the move to our new offices in Roeselare. Our new offices are the closure of a year filled with construction and tight deadlines. We would also like to invite you, as our customers, to stop by and visit us at our new location. We are delighted to show you our new work environment, our professional showroom and dynamic team.

In order to keep up pace with the fast global changes, we once again have some new products to present to you. Check out our novelties section on page 14 to discover them all.

Of course, all of this would not be possible without you and without our fantastic team. A special thanks to everyone associated with MVS In Motion.

The next step will be the transformation of our website, which will have the same branding as the catalogue. Just bear with us a moment longer, we will inform you about the launch soon.

We kindly invite you to pay us a visit at our booth at Medica 2023 and Arab Health 2024 to celebrate our complete transformation. Let's flip the page together to a new era of MVS In Motion.

Together, we will stretch our limits, fiercely and with a lot of fun!

Sincerely yours,

Evelyn and Tom

Brands

Our own brands

Master distributor for

MVS In Motion is a dynamic and quality-driven B2B company, with people dedicated to excellence in everything they do. We're a master distributor, specializing in physiotherapy, rehabilitation, sports, and fitness products. In 2021 the company was acquired by the new owners, Evelyn Deceuninck and Tom Vanhecke.

In 2023 we relocated to Roeselare (Belgium). True to our character, we completely reinvented ourselves. Now, we can proudly present the new and improved MVS In Motion.

... **EXPERTISE**

MVS In Motion is that one-stop shop that helps you to grow and succeed. Apart from offering valuable products, we support our customers with unique knowledge and expertise. Our basis is a good structure and well-oiled organization that efficiently responds to every question.

... **PASSION**

We make a difference through our passion. MVS In Motion is committed and does not give up. We are continuously taking steps to deliver the best.

... **DARING**

MVS In Motion is constantly looking out for interesting and relevant opportunities. We do this to keep up with the market needs.

... **VIBRANT**

Innovating, evolving, and excelling is in our DNA. We are constantly on the move and we bring out the best in ourselves as well as in our customers. We are vibrant and encouraging, thanks to the solid foundation and the strong MVS team. You can always rely on us.

... **INSIGHT**

Insight into your needs and wishes is crucial. That is why we keep improving our wide range of products. We are energetic, powerful, and we like to tackle anything head-on.

moves 

STRETCHING LIMITS

Moves is one of the own brands of MVS In Motion. It is a top-notch brand for people who want honest and terrific products. Moves helps you to become a better version of yourself. It helps you to stretch your limits. Under the Moves brand, we also offer Moves FIT products. These products have a unique colour sequence which distinguishes us from the known colours available on the market.

... ESSENCE

Moves is there for you. Our focus and high standards is what makes us able to assist you with essential products and specific expertise.

... HONEST

We are ready for each and every request for help. We deliberately opt for a wide but specialised product range. These products have long proven their worth. Honest products that excel in quality and convenience.

... EXPERTISE

Moves stands for expertise and professional know-how. A quality-driven brand that guarantees optimal support. Moves products help during your rehabilitation or movement optimization. They help you to achieve your goals and succeed.

... EVOLUTION

With the aid of Moves, you move forward, step by step, towards your desired progression. There are products for every phase, for every treatment. Moves is there to assist your evolution. You can bring your patient to the next level. With Moves, we help you to reach the top.

... MEANINGFUL

Moves keeps reinventing and improving its products. This brand has the ambition to do better each time. Moves makes the difference. We offer the best selection of products, that supports and eases the commitment and discipline of your patients.

mambo Fit.
Fun.
Fierce.
max

Mambo Max is the other brand of MVS In Motion. It's a light-hearted and fun brand that assists anyone in exercising with joy.

Mambo Max lights the fire to become a healthier and happier version of yourself. Get fit, become fierce, but most importantly: have a lot of fun!

... **ENERGY**

Mambo Max brings balance into your life. This brand inspires you to take action, to work out, to move. It even assists you in relaxation and massage. It is the perfect partner for a healthy life.

... **FIT**

A body that is in shape, is a healthy body. Mambo Max offers a complete assortment to keep your body fit. It helps you to build power, resilience, flexibility, and balance. Together with Mambo Max, you move forward, with the right balance.

... **FUN**

Mambo Max is a symbol for fun. Our colourful range of products emphasises this. The goal is to give you that optimal, fun workout. Exercising becomes a true pleasure. You have to admit, working on yourself doesn't have to feel like working, does it?

... **ATTRACTIVE**

Mambo Max is here for everyone. Young and old, skilled or newbie, for people that want to see results. We make sports and exercising attractive. The happy and appealing colours guarantee a light-hearted, playful range.

New products

Fabric elastic loops set

This trendy loop set is the perfect solution for building your muscle power in an easy and effective way. Due to the anti-slip pattern, they stay exactly where they need to be and you don't have to worry about them slipping off.

- Light grey: light resistance
- Dark grey: medium resistance
- Black: heavy resistance

SPECIFICATIONS

- ✓ Comes in a mesh bag
- 👁 Set contains 3 different resistances: light | medium | heavy

MicroFET™2 muscle test dynamometer

The wireless microFET™2 Digital Handheld Dynamometer is an accurate, portable Force Evaluation and Testing (FET) device. It is designed for taking objective, reliable and quantifiable **muscle testing measurements**. The microFET™2 aids in diagnosis, prognosis and treatment of neuromuscular disorders.

- Measurement range 0-136 kg (0-300 lb) force
- Easy-to-read LCD Displays shows peak force and elapsed time
- Selectable units of measure: pounds (lbs.), Newtons (N), or kilogram-force (kgf)
- Accuracy within 1% of the reading
- Two threshold settings for muscle testing: Low 0,4 to 136 kg (0,8 to 300 lb) in 0,05 kg (0,1 lb) increments and High threshold 1,4 to 136 kg (3,0 to 300 lb) in 0,05 kg (0,1 lb) increments
- Stores up to 30 tests
- Uses rechargeable lithium ion rechargeable battery
- Self-activating "sleep" mode after 3 minutes to extend battery life

O1 Resistive

One-stop-shop for all your bands and tubes

MVS In Motion is your one-stop-shop for all resistive exercise products. With our premium quality brand Moves, we offer both original colour and FIT colour sequence products. In addition, we offer a wide range of Latex-Free resistive exercise bands in original colours. Our tubes and loops are also available in the original and FIT colour sequence.

The latex bands, tubes and (super)loops are made of high quality latex from huge rubber tree plantations in Malaysia. All products have an extraordinary elasticity and linearity. They are the ideal partner for your physiotherapy trainings or intensive work-outs, because:

- ✓ our bands have the patented Snap-Stop® feature
- ✓ our tubes go through a dipped production process
- ✓ our (super)loops are equipped with a multi-layered structure

The different resistances allow you to use Moves and Moves FIT products for rehabilitation as well as for fitness purposes.

Moves Latex-Free is made from TPE, with the same high quality standards as the regular Moves bands. Never before were the characteristics from Latex-Free bands so close to those from their latex counterpart.

- ✓ **Moves Band:** 8 resistances (Tan - Gold) & 5 lengths (1,5m - 2,5m - 5,5m - 22,5m - 45,5m)
- ✓ **Moves FIT Band:** 6 resistances (Peach - Grey) & 4 lengths (1,5m - 2,5m - 5,5m - 45,5m)
- ✓ **Moves Latex-Free Band:** 5 resistances (Yellow - Black) & 3 lengths (1,5m - 5,5m - 45,5m)

Original colours		Same resistance	FIT colours	
	Tan Extra light			Peach Light
	Yellow Light			Orange Medium
	Red Medium			Lime green Heavy
	Green Heavy			Blueberry Extra heavy
	Blue Extra heavy			Plum Special heavy
	Black Special heavy			Grey Super Heavy
	Silver Super heavy			
	Gold Ultra heavy			

- Well-known colours used by physiotherapists all over the world
- Moves brings premium quality at an affordable price range

- FIT colours are more trendy and youthful than the original colours
- Sell Moves FIT next to Moves to widen customer base and generate more sales

What is Snap-Stop®?

Moves and Moves FIT Bands are unique in their field. Thanks to our extensive research and development, we have achieved an innovative production process: **the Snap-Stop® technology**. This distinctive feature will avoid sudden snapping when the band is exposed to high forces, even if there is a cut or puncture! This makes exercising with our bands much safer.

SNAP-STOP® FOR SAFER RESISTIVE EXERCISING

Elongation

Moves Bands can be stretched up to 300% elongation and Moves Loop Bands even up to 400% elongation! Therefore they are your perfect companion for a rehabilitation programme or a full body work-out. Most competitor's bands are not to be stretched more than 3 times their resting length, while a Moves Band easily achieves more, maintaining its amazing elasticity.

The high-quality material enables you to have a very wide array of resistances and possibilities.

Note:

- 50% elongation = 1,5 x lay-flat length
- 100% elongation = 2 x lay-flat length
- 150% elongation = 2,5 x lay-flat length
- 300% elongation = 4 x lay-flat length
- 400% elongation = 5 x lay-flat length

Band

Premium quality, powder-free, latex resistive exercise bands. Tear-resistive thanks to the Snap-Stop® fabrication process. The Moves Band provides positive as well as negative forces on the muscles. Furthermore it improves the range of motion, the strength and the cooperation of the muscle groups.

SPECIFICATIONS

Lay-flat-length: available in 5 different lengths

Width: 127mm

Tube **MD** **CE**

Our high-standard Moves Tubes are created by an intensive dipping process. The multiple layers guarantee a strong and safe training product. Extruded tubes are more susceptible to damage and can easily snap. So, our multi-layered dipped tubes are a superior and durable product. Train all the muscles in your body and improve your body flexibility.

Be assured of an exceptional strength to elongation linearity from our tubes.

PACKAGING

1 unit: 10 individually packed pcs of the same colour/resistance

Loop

Moves Loops are extremely portable and unbelievably versatile products. They are very effective instruments for stretching and strengthening all muscle groups. The Moves Loops are multi-layered, which makes them thicker and more durable. The benefit of these thicker loops is that they won't roll up during exercising, which avoids the uncomfortable feeling from thinner alternatives.

SPECIFICATIONS

Lay-flat-length: 30cm

Width: 2,5cm

Contains natural latex rubber

FIT tube **MD** **CE**

Just like the Moves Tubes, the Moves FIT Tubes are also produced using an intensive dipping process. Therefore, these multi-layered tubes ensure a safe and strong training. This is a big advantage over extruded tubes, which are more susceptible to damage and can easily snap. Get these hip & trendy FIT colours now!

Multi-Grip™ Exerciser

Have unlimited exercise options with the Multi-Grip™ Exerciser. Each exerciser contains both large and small loops that are easy to grip. Use small loops as an anchor or for finger exercises. Use the larger loops around the hands and feet to perform high impact upper and lower body exercises. Change resistance easily by moving 1 loop up or down the exerciser or use a different coloured exerciser out of the 8 different resistance levels.

SPECIFICATIONS

- Length: 30 yard roll (27,4m)
- Width: 4,5cm
- Material: unscented cloth that can be washed and dried. Does not contain latex or a powder coating.

moves

Knee rope pulley

MD C E

The Moves Knee Rope Pulley helps increase range of knee motion. This easy-to-use product can be mounted in a doorway to help you recover from or prevent knee injuries.

While sitting on a chair, put your foot into the ankle strap. A rope starts from the ankle strap, goes through a pulley and ends at a wooden handle designed for a 2-handed grip. Pull your foot carefully upwards by moving the handle towards your abdomen which will generate a rotational movement at your knee.

O2 Hand

Flex-Ion MD CE

The Moves Flex-Ion is the ultimate rehabilitation product after a hand injury. The spring-loaded buttons isolate each digit so stronger fingers cannot compensate for the weaker ones. This results in a better, faster & more controllable rehab process.

The gradual resistance system of the Moves Flex-Ion helps therapists measure progress. Additionally, the ergonomic base adds comfort and stability.

The Moves brand assures a top-notch product!

Digi-Extend®

The Digi-Extend® is a unique therapy device that can isolate the extension of all five fingers and each of the individual finger joints. The product strengthens the intrinsic and extrinsic muscle groups to maximise extensor tendon gliding, joint motion, coordination and muscle function in the hand and forearm.

Patients can choose between 5 resistance levels that are easily changeable. This way, you can vary the hand positions for specific exercises to help maximise your exercise goals and prevent injury.

	Extra heavy 5,5 kg	O2-O6O3O5	1 pc

SPECIFICATIONS

Resistance: available in 3 different levels

VariGrip Therapy

This product has the ability to **adjust tension in each individual finger**. The resistance from each single finger knob can easily be adjusted incrementally on the patient's need, which minimises overcompensation and strain. This also allows the patient to progress steadily.

Comparison Chart (kg per digit)

VariGrip	X-Light	Light	Medium	Heavy	X-Heavy
Digi-Flex® / Flex-Ion	0,7	1,4	2,3	3,2	4,1

Each VariGrip's highest resistance ends where the next VariGrip resistance starts. Any other hand exerciser increases from light (1,4 kg) to medium (2,3 kg). That's almost a 70% increase gap, which can cause an overload on the muscles, resulting in injuries. The seamless progress from one VariGrip to the other, supported by the **padded finger and palm area**, guarantees a safe recovery and better feel for those with sensitivity issues.

Reference code	Colour	Resistance (range per digit) and level	Unit
O2-100102	Yellow	X-Light 0,7 - 1,4 kg Level 1	1 pc
O2-100106	Black	X-Heavy 4,1 - 5,4 kg Level 5	1 pc
O2-100107		VariGrip set 5 resistances 1 display	Set of 5
O2-100108		VariGrip empty display Plastic	1 pc

VariGrip Sport

The VariGrip Sport has the patented ability to **adjust the tension level in each individual finger**. This allows the user to create a custom programme to build and improve endurance, strength and dexterity more effectively for individual fingers, as well as the entire hand, wrist and forearm.

The VariGrip Sport is the only exerciser of its kind that includes a **callus builder**, ideal for climbers, gymnasts, gamers, musicians, and athletes of all levels.

This product also has **soft touch digits**, which provide comfort for users with sensitivity issues.

Reference code	Description	Resistance (kg)	Unit
O2-100303	VariGrip Sport	2,3 - 4,1 kg	1 pc

Constant Force X-Tend

Unlike elastic-based exercisers that increase in resistance the further the unit is extended, this product uses retractable-based resistance, which keeps a constant level of resistance from start to finish. Ergonomic in design, the Constant Force X-Tend works the intrinsic and extrinsic extensors of the hand and can isolate MP/PIP/DIP joint motion.

Reference code	Colour	Resistance (per digit)	Unit
O2-100403	Red	Light 0,11 kg	1 pc
O2-100404	Green	Medium 0,18 kg	1 pc
O2-100405	Blue	Heavy 0,27 kg	1 pc

Squeeze balls & eggs MD CE

The Moves Squeeze Ball provides a progressive sequence of 5 colours/resistances. It strengthens hands, fingers, forearms and will work the muscles separately or in tandem. It's a small and accessible product that you can bring anywhere.

The Moves Squeeze Egg, also available in 5 levels, is ergonomically shaped to provide highly effective exercise for the rehabilitation and strengthening of weakened or injured fingers, hands and wrists.

Both the Balls and Eggs are compact and easy to use products that you can take everywhere you go. They can help to:

- ✓ Rehabilitate post-operative / post-traumatic hands and arms
- ✓ Restore function in hands, arms and shoulders following a stroke
- ✓ Reduce Pain and stiffness in arthritic fingers, hands and wrists
- ✓ Relax tense, sore muscles
- ✓ Reduce stress
- ✓ Strengthen ageing hands and arms

PACKAGING

-  1 putty of the selected colour/resistance pre-packed in a container of the chosen weight

Why antimicrobial agents?

Antimicrobial agents **kill bacteria** without additives and they **prevent the growth of odour-causing microbes**. Moves Comfort Putty contains natural anti-microbial agents without the addition of toxic chemicals. This ensures that the Moves Comfort Putty material **retains its hygienic, non-greasy feel** from day one. Cheaper alternatives on the market do not contain these agents, which makes them the ideal breeding ground for bacteria and fungi. Why? Because a small number of bacteria and other micro-organisms will always be present on the patient's hands and because putty should be stored in room temperature conditions. This makes antimicrobial agents **a must for this product**. Apart from protecting the putty from bacteria and fungi, antimicrobial agents also **extend the product's lifespan** and **improve its cleanliness**.

Benefits of antimicrobial agents:

-  Non-greasy
-  Hygienic
-  Clean
-  Durability
-  Odourless
-  Allows multiple users

Theraflex™ putty MD CE

Just like the Moves Comfort Putty, the Theraflex™ Putty is multi-purposed: it can be used for both rehabilitation purposes, as for stress relief. It is odourless, does not stain and will not leave any residue on the patient's hand. Theraflex™ Putty is also non-toxic, greaseless, hypo-allergenic and it contains **antimicrobial agents** which makes it a very hygienic & safe product to use.

O3 Upper & Lower Body

Oxycycle 1 - active magnetic MD CE

For ACTIVE training only | For HOME use only

The Moves Oxycycle 1 Pedal Exerciser is used for upper and lower body exercises. This is a great product to progressively strengthen your arms and legs, because you can **adjust the resistance**.

SPECIFICATIONS

- ↔ Measurements: 50 x 46 x 38 cm
- 📏 Weight: 9 kg
- 📖 Multi-function LCD display readout of scan, time, distance, calories and RPM
- ✔ Including: non-skid mat, interchangeable handgrip pedals and strap pedals
- 🕒 **Maximum 1 hour per day**
Maximum 30 minutes per session

Reference code	Description	Unit
O3-O1O1O1	Moves Oxycycle 1 Pedal Exerciser	1 pc

Oxycycle 2 - passive CE

For PASSIVE training only | For HOME use only

The Moves Oxycycle 2 Pedal Exerciser is a great tool for personalised, low-stress workouts at home. The **adjustable speed level** makes it the ideal product to gradually strengthen your arms and legs. This pedal exerciser provides low-impact exercise to increase strength and flexibility. It's versatile for both upper and lower body and it improves the blood circulation.

It offers up to 60 Watts of motorized assistance, whereas cheaper models only carry a 30-Watt motor. So the Oxycycle 2 has enough power to maintain a constant rotational speed. A safety stop will avoid injury in case of cramp or muscle spasm.

SPECIFICATIONS

- ↔ Measurements: 50 x 46 x 38 cm
- 📏 Weight: 8,5 kg
- 📖 Multi-function LCD display readout of scan, time, count, RPM-level and estimated calories burned
Hz: 50
RPM: 25 - 65 (Rotations Per Minute)
- ✔ Including: non-skid mat, interchangeable handgrip pedals and half-foot pedals
- 🔌 This product comes with a UK or EU plug
- 🕒 **Maximum 1 hour per day**
Maximum 30 minutes per session

Oxycycle 3 - active & passive

For ACTIVE and PASSIVE training | For HOME use only

Increase your strength and flexibility with the Moves Oxycycle 3! This low-impact pedal exerciser can **adjust both the speed level and resistance**, which makes it the ultimate product to build strength in your arms and legs.

Unlike most cheaper models, which only carry a 30-Watt motor, the Moves Oxycycle 3 offers up to 80 Watts of motorized assistance. This assures a constant rotational speed. For your safety, a stop is integrated to prevent injury in case of a cramp or muscle spasm.

SPECIFICATIONS

- Measurements: 50 x 46 x 38 cm
- Weight: 8,5 kg
- Multi-function LCD display readout of scan, time, count, RPM-level and estimated calories burned

moves CE

Wooden incline board MD CE

The Incline Board increases extension in the lower and upper back while stretching the calves. It can be used to:

- improve the general posture,
- stretch the calf muscles of athletes, football players and sportspersons in general,
- stretch the upper-leg muscles (Ischias),
- increase extension in the lower and upper back.

THE MOVES WOODEN INCLINE BOARD - LADDER

This product is made out of natural birch wood and is very solid. It is adjustable in 4 different angles (10°, 15°, 20° and 25°). After using it, you can easily fold the Incline Board to achieve a compact form when it needs to be stored.

↔ Measurements: 50 x 29,5 x 3,5 cm

THE MOVES WOODEN INCLINE BOARD - FIX

The perfect product if you are looking for an easy and budget-friendly Incline Board. It's made out of polymerised wood for a strong feel and high user weight. The inclination (17,5°) is perfect for physiotherapy exercises.

↔ Measurements: 45 x 30 x 16 cm

- ✓ Cardboard packaging
- ✓ Including a convenient storage case, USB-C charging cable and 5 attachments

Triggerpoint rollers

Massage rollers are used to put pressure on muscles' triggerpoints and to loosen the tension in the muscles. Triggerpoints are often the cause of different pains.

1. SPIKY FOAM ROLLER

This product is designed for **deeper massage & acupressure** therapy. The spikes make it possible to get deeper into the muscles to relieve tension and soreness and to improve mobility. The Spiky Foam Roller has a bi-directional zone for comfort when rolling along the spine. It is mainly used for stretching, self-massage, body support and stability exercises.

SPECIFICATIONS

 Length: 33 cm

 Diameter: 13 cm

Reference code	Description	Unit
O4-O5O1O3	Mambo Max Spiky Foam Roller	1 pc

2. HOLLOW FOAM ROLLER

The Hollow Foam Roller easily helps people who are experiencing **long term pains**. Its 3-dimensional pattern with different shapes replicates the massage from a therapist's hands. The larger surfaces allow a superficial massage while the smaller shapes are meant for deeper massage.

SPECIFICATIONS

 Length: 33 cm

 Diameter: 14 cm

Reference code	Description	Unit
O4-O5O1O1	Mambo Max Hollow Foam Roller	1 pc

3. ERGONOMIC FOAM ROLLER

The Mambo Max **Ergonomic Foam Roller** is a curved, hollow foam roller, which enables a lot of exercises. Besides rolling back and forth, it is possible to make sideways movements. More muscles will be addressed through which the body will be toned even more. The soft foam in combination with the nipples is perfect for trigger point massages. The central groove will **reduce pressure on the spine**.

SPECIFICATIONS

 Length: 33 cm

 Diameter: 15 cm

Reference code	Description	Unit
O4-O5O1O2	Mambo Max Ergonomic Foam Roller	1 pc

4. 3-IN-1 FOAM ROLLER

The Mambo Max 3-in-1 Foam Roller combines 3 different foam rollers in one package. Thanks to its smooth surface, the **outer part** is perfect for a superficial massage. The **second part** has grooves which can be used for a deeper massage and to exercise higher pressure on the trigger points. Finally, with the **inner massage stick** it's possible to improve blood circulation and the muscles' recovery time.

This last item, the **Mambo Max Massage Stick**, is also available as a separate product

SPECIFICATIONS

-  Length: all 3 parts are 46 cm
-  Diameter:
- outer part: 15 cm
 - second part: 10 cm
 - inner massage stick: 4 cm

MESSAGE STICK

IASTM tools

Moves IASTM Tools (Instrument-Assisted Soft Tissue Mobilization Tools) enable therapists to **treat acute and chronic soft tissue dysfunction**. The tools are used in physical therapy, trigger point therapy, for myofascial release and various other treatments. They can be used on many body parts, including muscles, tendons, ligaments, and fascia.

IASTM works like a standard massage, but specialized instruments are used instead of a physical therapist's hands. These instruments are designed to apply a specific amount of pressure to tissue so that a therapist can work through it without causing damage or pain to the client.

HOW TO CHOOSE THE RIGHT IASTM TOOL?

Each tool has multiple shapes and finished edges to increase its employability. The smaller ones are generally used for the treatment of smaller parts of the body, smaller strokes and reaching superficial tissue structures. The larger and heavier ones are used to reach deeper and are suitable for the treatment of larger parts of the body. Some instruments are also used to “feel” blockages by stroking/scanning across the tissue. The tips of these instruments can be either blunt or sharp, depending on the treatment given. As a general rule, the sharper the tool, the more intense and specific the soft tissue treatment. Finally, the choice of the right tool is different for every therapist. Everyone has their personal preferences and the tool should feel comfortable in one's hand. With our 6 tools, you can easily customize your treatment based on both your needs and the clients needs.

SPECIFICATIONS

- ✓ Sold as a set of 6 (different types)
- Q Material: high-grade stainless steel and a brushed finish (less prone to scratches and smudges are less visible)

USE AND DIMENSIONS OF EACH TOOL

The first tool is ideal to work some of the **larger muscles**.
E.g. the lower leg, chest, upper arms, back, lats and upper- or lower legs.
 20 x 3 cm

The second instrument is often used for **medium sized areas**.
E.g. the neck, calves or pectoral muscles.
 19 x 4 cm

The largest tool has two handles and a round side for deep treatment. It is designed for **large muscle groups**.
E.g. the back, upper arms, hamstrings and thighs.
 45 x 4 cm

The fourth instrument is small, yet versatile. It's mostly used for working with **small muscles**.
E.g. the treatment of arms, shoulders, hands, feet and ankles.
 14 x 3 cm

This sturdy and versatile tool is perfect for **reducing tension, muscle pain and rebalancing the fascial network and body**. This tool is also useful for **scanning tissue**.
 7 x 6 cm

Finally, with this easy to hold tool you can treat **various muscle groups and joints**.
E.g. the hands, forearms, chest, back, upper- and lower leg.
 9 x 7 cm

Massage tools

THE KNOBBLE® II

This is a massage tool made of durable polymer with a non-latex band. The Knobble® II helps you to put more pressure on the area that you want to massage. Use either the tip or the base for applying pressure on yourself or others.

THE JACKNOBBER® II

It's a massage tool that can be used in many ways to apply deep pressure to myofascial triggerpoints and areas of muscle tension. The smaller knobs provide more intense pressure, while the larger knobs give you a more diffuse pressure. Use one knob at a time to press deeply into taut bands with embedded triggerpoints. Use two knobs at a time on either side of the spine.

THE INDEX KNOBBER® II

The Index Knobber® II is a simple device designed to let you apply deep pressure to muscles within easy reach of your hand. It is the ideal instrument for clinic or home use allowing for firm, sustained pressure on targeted muscles. Its unique design allows it to be used in several hand positions and it can easily be used with both your right and left hand.

THE PALMASSAGER™

This tool is one of the most efficient massage therapy aids available anywhere. Hold it firmly in the palm of your hand and use one, two or three of its round knobs to massage sore muscles. It is used for back, shoulders, arms and legs.

THE BACKNOBBER® II

The Backnobber® II massage tool allows the user to apply as much pain-releasing pressure as they require. Remarkable effects can be achieved using this device. A locking mechanism permits it to come apart for convenient traveling and storage.

Sport tape

The Moves Sport Tape is a non-elastic tape used **to limit motion**. The tight binding nature of the Sport Tape **decreases circulation**. This tape is made from quality cotton fibres which makes it soft and comfortable, while still providing maximum compression. The skin-friendly Moves Sport Tape is latex-free, breathable and water-resistant. The special adhesive (hypoallergenic Zinc oxide hot melt adhesive) makes sure that the tape is fixed and secure during exercise. The serrated edges make it very easy for the tape to be torn by hand.

SPECIFICATIONS

moves

Kinesiology tape

Moves Kinesiology Tape is used **to facilitate motion, inhibit pain and improve circulation** while still supporting the muscles and joints. With its wave-like structure, this tape can be stretched up to 170% lengthways. This tape is also made from fine cotton fibres, which results in a soft and comfortable tape. The skin-friendly product is hypoallergenic, latex-free, breathable and water-resistant. The adhesive side is made of acrylic which prevents sweat and moisture from penetrating the tape.

Aerobic step

Step aerobics is a form of aerobics that is practised worldwide by millions of people. The reason for its popularity is simple, it offers a great cardio workout without the need for extensive space or equipment.

Furthermore, it's low impact and it doesn't stress the joints as much as running or jogging.

The height of the Mambo Max Aerobic Step is adaptable, which allows you to **adjust the intensity** of the work-out according to your preferences.

SPECIFICATIONS

Measurements: 96 x 33 cm

Height can be altered to **15 / 20 / 25 cm** by using blocks underneath the step

Fabric elastic band

The Mambo Max Fabric Elastic Band consists of 10 consecutive loops. This great toning and workout tool is suitable for every kind of athlete, whether you're a beginner or a professional. There are 3 different resistances available, while the 10 consecutive loops allow you to spice things up as well. Intensify your physical training by using a lower amount of consecutive loops resulting in a higher resistance.

This product is durable and extremely versatile. You can use it for stretching, toning or even as an alternative for dumbbells as a weight training accessory.

SPECIFICATIONS

Total length: 120 cm
1 loop length: 11,5 cm

Resistance: available in 3 different levels

Balance board

The Mambo Max Balance Board is an effective tool for balance training and fitness exercises. Stand on the rounded platform and start balancing. It is also a great tool to strengthen your ankles and thigh muscles. For a more severe balance training, add the included screw-on top to your Mambo Max Balance Board.

SPECIFICATIONS

Ø Diameter: 42 cm

↕ Height: 5 - 8 cm

Reference code	Description	Unit
O5-O4O2O1	Mambo Max Balance Board	1 pc

Wooden balance boards

These Balance Boards are the ideal solution if you want to improve your balance on an **ecologic, high-end product**. They are often used for proprioception training, which challenges and develops proprioceptive receptors. Proprioception helps to stabilise a joint during static and dynamic functional tasks. Proprioception exercises can decrease your risk of injury.

The Wooden Balance Board is available in 3 versions: Uni-Directional, Standard & Sport. Thanks to their different form and balance point, these products have a very different character and level of difficulty.

UNI-DIRECTIONAL

This board offers a **more predictable** and **confident training** as it can only pivot in 1 direction. Making it ideal for children and elderly to improve body stability without the fear of falling.

When turning this board upside-down, the arches can be used as push-up grips.

□ Measurements: 40 x 40 cm

↕ Height: 10 cm

STANDARD

The Balance Board Standard is lower than the Sport version. In addition, with its **smoother pivot point**, it reacts completely different than the Sport. It's a great middle step between the Uni-Directional and Sport Balance Boards.

□ Measurements: 40 x 40 cm

↕ Height: 6 cm

△ Max inclination: 12,5°

SPORT

The **most challenging** Balance Board is our Sport version, which, as the name specifies, makes it a real sport. Finding your balance and avoiding the edges touching the ground is hard and requires you to use all the muscles in your body. It's a great and fun way to do a **full-body workout**.

Ø Diameter: 40 cm

↕ Height: 9 cm

△ Max inclination: 20°

Balance pad pro

This Balance Pad is a great training tool to improve your balance, stability, flexibility, strength and motor skills. The Balance Pad Pro **creates more instability** than our regular one, so you constantly need to correct body posture, making the exercises just that bit tougher. This Balance Pad is made out of **PU-material** instead of EVA-foam (which most balance pads are made from), which makes it **more durable** and less prone to small damages and wear.

AB peanut ball

The Mambo Max **AB (Anti-Burst)** Peanut Ball helps **users who struggle with the instability** of a regular gym ball. The peanut shape offers extra sideways stability, which gives more confidence to start working out with gym balls.

The Mambo Max AB Peanut Ball offers a more predictable therapy or fitness training as it can only roll in one direction. This certainly is a huge benefit for children, elderly or people who suffered an injury. In addition, peanut balls are very popular amongst pregnant women and are very helpful devices during labour.

PACKAGING

- ✓ 1 AB Peanut Ball in a cardboard retail pack
- ✓ Includes: Faster Blaster Pump and plug.

Medicine ball

A Medicine Ball (also known as an exercise ball, a med ball, or a fitness ball) is often used for strength training. It is used for rehabilitation from an injury and therefore plays an important role in the field of **sports medicine**.

Moreover, it is the ideal attribute for training multiple muscle groups because of the combination of cardio and strength training.

Medicine ball training is one of the oldest forms of strength and conditioning training.

Coming soon:

Hydrocollator and moist heat packs €

Constructed of seamless, stainless steel, a hydrocollator is a stationary or mobile thermostatically controlled liquid heating device. Once heat packs are inserted into the water inside, the hydrocollator heats them up to maximum 76°C. From here, the health professional removes the pack to wrap it in multiple towels and apply to the area being treated. The packs themselves draw in the heat to hold their temperature.

This treatment assists with pain management, addressing spasms, improving a patient's range of motion and loosening tight, contracted muscles before a massage, physical therapy or athletic training session or chiropractic adjustment.

MOVES MOIST HEAT PACK UNITS

The unit heats moist heat packs up in a water bath up to 76°C. We offer 4, 6 and 12 pack unit capacity.

Each Moves moist heat pack unit is made from durable seamless, stainless steel which makes them easy to clean. All heating units are fully insulated. This insulation prevents the exterior from becoming too hot and it keeps the temperature of the heating unit inside.

MOIST HEAT PACKS

The moist heat packs are easy to heat up and they retain the moist heat for up to 30 minutes. They're reusable and can be used with a cover or a towel.

MOIST HEAT PACK COVERS

We also offer moist heat pack covers, to cover a hot pack unit. These are reusable and washable.

MOIST HEAT PACK IN A COVER

HYDROCOLLATOR (HEATING UNIT)

MOIST HEAT PACKS

Hot/cold pack MD CE

The Moves Hot/Cold Packs are used for hot as well as cold therapy. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The versatile, reusable packs deliver therapy effectively and economically. The use of the Moves Hot/Cold Pack is unlimited and its material is non-toxic. Even below -20°C it remains soft. The Moves Hot/Cold Pack can be bent in any angle, allowing maximum coverage of joint and muscle. All Hot/Cold Packs can be heated (microwave) and can be frozen (freezer). The temperature holds for approximately 30 minutes.

PearlPack

Hot and cold therapy can be used to relieve pain and inflammations associated with muscle strain and sprain. This dual applicability makes them a strong alternative to ordinary heating pillows and ice packs. The small pearls absorb heat or cold, which they can retain for 20 minutes. During this time, these packs will relieve a part of your pain.

Not only do they look good, the products are very convenient in use. PearlPacks won't feel wet, nor drip after freezing or heating them, avoiding a mess. You can also use these in **direct contact with the skin**. All materials used are non-toxic and odourless.

Besides relieving pain from an injury or muscle strain, hot/cold packs are often used to reduce swelling after an operation. PearlPacks truly are multifunctional products.

PEARLPACK | SPORTS PACK & STRAP

The PearlPack Sports Pack comes with a handy velcro strap.

PEARLPACK | BACK WRAP

This large pack divided in 3 segments is equipped with a velcro strap. It fits perfectly around the user's waist for an optimal pain relief on the back. The pearls can be pushed from one segment to the other if one area of the back needs less or more thermal treatment.

PEARLPACK | EYE MASK

This mask adapts to the user's face and has a fabric strap. Hot treatment can be applied when the eyes feel dry or if there's an infection of the eyelid. Cold treatment will help when suffering from headaches, swollen eyes or sinusitis.

PEARLPACK | KNEE/ELBOW

This offers a solution for hot/cold therapy on the knee or elbow joints. The large opening ensures that your knee or elbow remains free, so you can continue to move freely, while the Pearl technology sends direct relief to the pain area. The flexible velcro strap keeps the pack firmly in place.

Reference code	Description	Dimension	Unit
07-O40102	Moves PearlPack Sports Pack+ strap	19 x 12,5 cm	1 pc
07-O40201	Moves PearlPack Back Wrap	43 x 17,5 cm	1 pc
07-O41101	Moves PearlPack Eye Mask	22,5 x 7,5 cm	1 pc
07-O40301	Moves PearlPack Knee/Elbow	37 x 25,6 cm	1 pc

Roll-on pack MD CE

Moves Roll-On Packs combine hot/cold treatment with practicality. The tubular shape and flexible material allow an easy roll-on application, even after being heated or frozen. The various sizes will fit perfectly over your finger, wrist, ankle or knee. This design ensures that the whole area will benefit from the treatment.

SPECIFICATIONS

-  Available in 5 sizes
-  Reusable, non-toxic and latex-free
-  Each Roll-On Pack includes a protective sleeve

moves

Instant heat pack

Have you ever needed a heat pack, but there was no kitchen or microwave in sight? Moves has the perfect solution for you! Your heat pack on-the-go. Simply flex the metal disk inside our Moves Instant Heat Pack and **within seconds** it will warm up to around a comfy **54°C**. Furthermore, it is **reusable** many times! Just boil the pack for 10 to 15 minutes and it will return to its original fluid state.

The Moves Instant Heat Pack comes in **two different sizes**:

1. POCKET SIZE PACK

Perfect for outdoor activities! Easy to use while camping, going to sporting events or whenever you go outside in colder weather. It is small, lightweight and fits neatly in your pocket.

2. SHOULDER & NECK PACK

This 3-piece instant heat pack is designed to fit comfortably around your neck and shoulders. The instant heat pack loosens your muscles and relieves pressure and soreness.

Reference code	Description	Dimension	Unit
O7-O6O1O1	Moves Instant Heat Pack Pocket	12,7 x 7,6 cm	1 pc
O7-O6O111	Moves Instant Heat Pack Shoulder & Neck	41 x 25 cm	1 pc

O8 Evaluation

New: MicroFET™2 muscle test dynamometer

The wireless microFET™2 Digital Handheld Dynamometer is an accurate, portable Force Evaluation and Testing (FET) device. It is designed for taking objective, reliable and quantifiable **muscle testing measurements**. The microFET™2 aids in diagnosis, prognosis and treatment of neuromuscular disorders.

- Measurement range 0-136 kg (0-300 lb) force
- Easy-to-read LCD Displays shows peak force and elapsed time
- Selectable units of measure: pounds (lbs.), Newtons (N), or kilogram-force (kgf)
- Accuracy within 1% of the reading
- Two threshold settings for muscle testing: Low 0,4 to 136 kg (0,8 to 300 lb) in 0,05 kg (0,1 lb) increments and High threshold 1,4 to 136 kg (3,0 to 300 lb) in 0,05 kg (0,1 lb) increments
- Stores up to 30 tests
- Uses rechargeable lithium ion rechargeable battery
- Self-activating "sleep" mode after 3 minutes to extend battery life

Description	Reference code	Unit
MicroFET™2 Muscle Test Dynamometer	12-O381W	1 pc

Fingertip pulse oximeter

A Pulse Oximeter is a very important and common device to check the patient's **blood-oxygen saturation (SpO₂) level** and **pulse rate**. As a compact, reliable and durable monitoring device, the Fingertip Pulse Oximeter greatly enhances patient care.

JUNIOR OXIMETER

Designed for kids from 3 - 12 years old.

- Rechargeable via USB-cable
- Dual colour OLED-screen displays SpO₂, PR, pulse bar and waveform
- 4-direction & 6-mode display for convenient reading
- Set-up alarm range of SpO₂ and pulse rate
- Menu-function setting (beep sounds, etc.)
- Lithium battery; automatically power off
- Gravity function, automatic rotating reading option

ADULT OXIMETER

Features:

- Dual colour OLED-screen displays SpO₂, PR, pulse bar and waveform
- SpO₂; measurement range between 70%-99% accuracy; ± 2% on the stage of 80%-99%
- PR; measurement range between 30BPM-240BPM accuracy; ± 1BPM or ±1% (the larger one)
- Low power indicator
- 6 display modes with adjustable brightness
- Automatically power off
- AAA alkaline batteries

Reference code	Description	Unit
O8-O7O2O1	Fingertip Pulse Oximeter Adult OLED 2 x AAA	1 pc
O8-O7O2O2	Fingertip Pulse Oximeter Junior 3-12y old OLED Rechargeable	1 pc

Blood pressure monitor MD CE

The blood pressure monitor is used for measuring **blood pressure** and **pulse rate**. It is suitable for people older than 12 years. It features:

- Large LCD display: 72 x 43,5 mm
- 2 users, 99 memories per user
- Irregular heart beating sign
- Indicating blood pressure level in 4 colours
- Average of last 3 records
- Low power detection
- Over pressure protection
- Automatic switch-off

Reference code	Description	Unit
O8-O7O5O1	Blood Pressure Monitor + Cuff	1 pc

Infrared thermometer MD CE

EAR & FOREHEAD THERMOMETER

The infrared thermometer is used for measuring body temperature by two-in-one functions: Ear and Forehead temperature. It is suitable for both medical and home use.

- Fast and easy temperature measurement by advanced infrared technology
- Range between 34,0°C-43,0°C accuracy; <35,0°C and >42,0°C = ± 0,3°C
- Memory mode
- Suitable for both infants and adults
- Easy operating and cleaning
- Automatic power off after 60 seconds
- 2 AAA alkaline batteries
- Tri-colour backlit:
 - <37,4°C
 - 37,4°C ~ 38,0°C
 - >38,0°C

SHOTGUN THERMOMETER

Measures your body temperature without direct contact with the skin. Can measure between 5-15 cm from the skin.

- Detailed 34 memories with time/data
- Response time: 1 second
- Effective distance: 5-15 cm
- User guidance by infrared beam
- Fever alarm

Reference code	Description	Unit
O8-O7O3O1	Infrared Thermometer Ear & Forehead auto-sensing 2 x AAA	1 pc
O8-O7O3O3	Infrared Thermometer Shotgun Forehead auto-sensing 2 x AAA	1 pc

Pedi-scoliometer

Scoliometers are inclinometers designed to **measure trunk asymmetry or Angle of Truncal Rotation (ATR)** used in scoliosis screening programmes. They are small, non-invasive devices which are placed over the spine while a person is in the forward bending position. The scoliometer reading indicates the degree of trunk asymmetry (rotation).

Reference code	Description	Unit
08-060102	Pedi-Scoliometer	1 pc

moves

Neurological reflex instruments

1. BUCK HAMMER

Two heads for cutaneous sensation evaluation. Comes with a needle and a brush.

2. BABINSKI HAMMER

Pointed bottom can be used as gross aesthesiometer.

3. TAYLOR HAMMER

Used to elicit responses during an examination.

4. DEJERINE HAMMER

Used for testing deep tendon reflexes in a diagnostic evaluation. Double-sided head composed of two rounded rubber surfaces for increased comfort.

5. TROEMNER HAMMER

Shaped like a two-headed mallet. The larger mallet is used to elicit tendon stretch reflexes, and the smaller mallet is used to elicit percussion myotonia.

6. WARTENBERG PINWHEEL

Used to elicit cutaneous sensory and pain perception responses.

About the Saehan® brand

Saehan® provides a wide range of measurement products. For example dynamometers, goniometers, body fat calipers and so on.

All Saehan® products are CE and FDA approved.

Discover the product assortment [here!](#)

Hydraulic hand dynamometer MD CE

The Hydraulic hand dynamometer gives accurate grip strength readings without the patient being able to “feel” the handle move. The adjustable handle has 5 positions to adapt to any hand size. The indicator remains at the patient’s maximum reading until it is reset. This product has a scale in both kilograms and pounds.

SPECIFICATIONS

- ↔ Range: 0 - 90 kg (200 lb)
- ✓ Comes in a quality hard carrying case
- ✓ Warranty: 2 years

Reference code	Description	Unit
O8-O1O1O1	Saeahan Hydraulic Hand Dynamometer	1 pc

Hydraulic 3-piece hand evaluation kit MD CE

A portable hard carrying case containing all instruments necessary to evaluate the strength and range-of-motion of the hand and fingers.

SPECIFICATIONS

- ✓ Includes: hydraulic hand dynamometer
- ✓ Includes: hydraulic pinch gauge
- ✓ Includes: stainless steel finger goniometer 15 cm - 180° per 5°
- ✓ Warranty: 2 years

Reference code	Description	Unit
O8-O1O113	Saeahan Hydraulic Hand Evaluation Kit 3 pieces	Set

Hydraulic 7-piece hand evaluation kit MD CE

This 7-piece Hand Evaluation Kit is a complete set of instruments to evaluate the strength and range-of-motion of the hand and fingers.

SPECIFICATIONS

- ✓ Includes: hydraulic hand dynamometer
- ✓ Includes: hydraulic pinch gauge
- ✓ Includes: stainless steel finger goniometer 15 cm - 180° per 5°
- ✓ Includes: 2-point discriminator with 3rd point
- ✓ Includes: Wartenberg pinwheel
- ✓ Includes: finger gauge
- ✓ Includes: functional finger motion gauge
- ✓ Warranty: 2 years

Reference code	Description	Unit
O8-O1O117	Saeahan Hydraulic Hand Evaluation Kit 7 pieces	Set

Digital hand dynamometer with data transfer software - DHD-1

Designed for reliable grip-force evaluations. This hand dynamometer has an easy-to-read LCD display. It features an electronic zero calibration system and up to 40 test data can be stored in memory. It is powered by a rechargeable Li-Ion polymer battery and data will not be lost when changing the battery. The Data Transfer Software can transfer the test results into .txt-files, which can be easily accessed using Notepad or MS-Word for editing and printing.

SPECIFICATIONS

- ↔ Range: 0 - 90 kg (200 lb)
- ✓ Comes in a quality hard carrying case
- ✓ Includes: digital hand dynamometer
- ✓ Includes: DTS-software
- ✓ Includes: USB cable
- ✓ Warranty: 1 year

Reference code	Description	Unit
08-010201	Saehan Digital Hand Dynamometer - DHD-1	1 pc

Digital hand dynamometer with G-STAR™ software - DHD-3

The DHD-3 Digital Hand Dynamometer (SH1003) provides the same features as the DHD-1 when used as a stand-alone device, but adds automated Rapid Exchange Grip Testing. Using Auto Mode, up to 10 strength tests for each hand, as well as the time allowed to switch hands, can be configured to automate the testing procedure.

The Grip Strength Testing and Research (G-STAR™) is an easy to use software tool which automates grip strength testing and endurance testing in both clinical and research environments. All patient information and their test results are stored in an Access database.

SPECIFICATIONS

- ↔ Range: 0 - 90 kg (200 lb)
- ✓ Comes in a quality hard carrying case
- ✓ Minimum requirements: Windows XP and USB port
- ✓ Warranty: 1 year

Reference code	Description	Unit
08-010202	Saehan Digital Hand Dynamometer - DHD-3 (including G-STAR™ software)	1 pc

Squeeze dynamometer

The Squeeze (bulb) Dynamometer is the inexpensive device to reliably measure hand and finger strength. The dynamometer has an indicator dial that remains at the maximum reading until reset. Unit is calibrated in pounds and kilograms.

SPECIFICATIONS

- ↔ Range: 0 - 70 kg (150 lb)
- ✓ Comes in a quality soft pouch case
- ✓ Warranty: 1 year

08-010301	Saehan Squeeze Dynamometer 70 kg	1 pc

Smedley hand dynamometer

MD CE

The Smedley spring-type Dynamometer has been successfully used for many years to measure grip strength. The ergonomic handle is adjustable to fit all hand sizes. The unit is calibrated in kilograms and pounds.

SPECIFICATIONS

- ↔ Range: 0 - 100 kg (220 lb)
- ✓ Comes in a quality soft pouch case
- ✓ Warranty: 1 year

Reference code	Description	Unit
08-010401	Saehan Smedley Hand Dynamometer Ergonomic handle	1 pc

Back-leg-chest dynamometer

MD CE

This Dynamometer measures the strength of your back, leg and chest. The base provides secure footing. The chain length is adjustable to accommodate for height differences or to vary the point of force application. It shows both pounds and kilograms. The pointer remains at maximum until it is reset.

SPECIFICATIONS

- ↔ Range: 0 - 300 kg (660 lb)
- ✓ Comes fully assembled + 1,5 m chain
- ✓ Warranty: 1 year

Reference code	Description	Unit
08-010601	Saehan Back-Leg-Chest Dynamometer	1 pc

Pinch gauge

MD CE

MECHANICAL PINCH GAUGE

Uses for hand-strength testing by measuring tip, key and palmar pinch force. Made of durable painted stainless steel. Mechanical properties will not degrade over time. It can serve as a diagnostic tool or for monitoring the progress of rehabilitation

SPECIFICATIONS

- ↔ Range: 0 - 20 kg (45 lb)
- ✓ Warranty: 1 year

Reference code	Description	Unit
08-020102	Saehan Mechanical Pinch Gauge	1 pc

HYDRAULIC PINCH GAUGE

Uses the improved hydraulic system of the hand dynamometer to assure convenience, product reliability, measurement accuracy and repeatability. This results in a more accurate test result for all pinch tests.

SPECIFICATIONS

- ↔ Range: 0 - 20 kg (45 lb)
- ✓ Warranty: 2 years

About the Baseline® brand

Baseline® measurement instruments have been used by orthopedists, therapists, FCE administrators and professors since the 1980s. Many of you who have received therapy after an injury have probably had your progress tested throughout your rehabilitation with a Baseline® measurement instrument.

The product line includes instruments to measure strength, range-of-motion (ROM), sensory perception, body measurements and more.

It's time to upgrade to digital with the BIMS™ digital 5-position grip and pinch dynamometers!

WHY SWITCH FROM A HYDRAULIC DYNAMOMETER TO DIGITAL?

- Force is measured using load-cell digital technology that gives more accurate, repeatable, and consistent measurements
- No hydraulic oil is used to measure force, eliminating the risk of oil leakage and decalibration
- Resetting of max results is digital; standard hydraulic reset knobs are prone to breaking
- LCD screen makes results easy to read
- Saves time by calculating mean, SD, COV, and other statistics on the device

WHY SHOULD I CHOOSE BIMS™ DIGITAL DYNAMOMETERS?

- Extended testing capacity (135 kg grip (300 lb) / 45 kg (100 lb) pinch) is designed for the strongest and weakest patients
- Measures force consistently with $\pm 1\%$ accuracy
- Color LCD display graphically shows results
- Numerous testing protocols for advanced testing
- 5-position hand grip accommodates different hand sizes and tests
- Results saved on device with memory for over 1000 patients

BIMS™ digital (Load-Cell) 5-position dynamometers

- Adjustable 5-position handle fits all size hands
- Accurate and repeatable grip and pinch strength measurements
- Grip dynamometers have an extended testing capacity that measures grip strength up to 135 kg (300 lbs)
- Pinch dynamometers measure pinch strength up to 45 kg (100 lbs)
- Purchase the dynamometer that meets your practice needs: **Functional, Clinic** or **Deluxe**
- Subject/Test information can be entered at time of test: for example, dominant hand, handle position, exertion/rest times, units (lb/kg)
- **1 year warranty**

TEST PROTOCOLS

- **Live Test:**
Shows real time and maximum value. Test result is not stored
- **Quick Test:**
Shows real time and maximum value. Maximum is stored
- **GST (General Strength Test):**
3 tests are performed at the same handle position. Peak, mean, SD, and COV are stored
- **RET (Rapid Exchange Test):**
6 tests (alternating hands) are performed at the same handle position
- **MMVE (Modified Maximum Voluntary Effort Test):**
5 tests are performed; 1 at each handle position
- **MVE (Maximum Voluntary Effort Test):**
15 tests are performed per hand; 3 at each handle position
- **Fatigue (Work Test):**
1 extended time test is performed. Results can be used to compare strength exerted (total work performed) over 2 or more user defined time periods

3-PIECE SETS INCLUDE GRIP DYNAMOMETER, PINCH DYNAMOMETER, PLASTIC FINGER GONIOMETER (12-1014), CARRY CASE, INSTRUCTIONS AND NORMS

FUNCTIONAL MODEL MD CE

This model does everything a standard hydraulic dynamometer can do with greater accuracy and repeatability. Use to view **live strength readings** with the **Max Force** test.

CLINIC MODEL MD CE

This model is ideal for clinic practitioners to perform timed tests which are **calculated and saved on the device**. It includes the **Max Force**, **Quick**, and **GST** tests.

DELUXE MODEL MD CE

This model expands upon the Clinic model and includes **more advanced timed tests** that are ideal for research applications, Workers' Compensation, FCE (Functional Capacity Evaluation) and day-to-day testing. It includes **Max Force**, **Quick**, **GST**, **RET**, **MMVE**, **MVE**, and **Fatigue** tests.

5-position hydraulic hand grip dynamometer

MD CE

- This product gives accurate grip strength readings without the subject being able to "feel" the handle move
- Readings are repeatable
- Maximum reading remains until reset
- Readings in lb and kg
- CE certified; manufactured and serviced in the USA since 1978
- Recalibration available once/year based on warranty
- Five position handle and body contours assure results consistent with published Baseline[®] and Jamar[®] studies
- Internationally accepted design assures reliability, accuracy and repeatability
- Lightweight units include protective carry case, instructions for use and norms
- **90 kg (200 lb) capacity, 6,4 cm (2,5") diameter dial head**

This set contains the following components:

- **Hydraulic hand grip dynamometer LiTE[®] | Red finish | 1 year warranty (12-O241)**
- Mechanical pinch gauge | 13,6 kg (30 lb) | Blue finish (12-O200)
- Stainless steel goniometer
- 2-point discriminator with 3rd point
- Wartenberg pinwheel
- Finger circumference gauge
- Functional finger motion gauge

SET 1

Reference code	Description: Grip / Pinch	Warranty	Unit
12-O102	90 kg (200 lb) (12-O241) / 13 kg (30 lb) (12-O200) LiTE [®]	LiTE [®] 1 year warranty	Set

2. STANDARD SET (12-O100)

This set contains the following components:

- **Hydraulic hand grip dynamometer Standard | Blue finish | 2 year warranty (12-O240)**
- Mechanical pinch gauge | 13,6 kg (30 lb) | Blue finish (12-O200)
- Stainless steel goniometer
- 2-point discriminator with 3rd point
- Wartenberg pinwheel
- Finger circumference gauge
- Functional finger motion gauge

SET 2

Reference code	Description: Grip / Pinch	Warranty	Unit
12-O100	90 kg (200 lb) (12-O240) / 13 kg (30 lb) (12-O200) Standard	Standard 2 year warranty	Set

3. HD[®] SET (12-O117)

This set contains the following components:

- **Hydraulic hand grip dynamometer HD[®] | Black finish | 5 year warranty (12-O221)**
- Mechanical pinch gauge | 13,6 kg (30 lb) | Blue finish (12-O200)
- Stainless steel goniometer
- 2-point discriminator with 3rd point
- Wartenberg pinwheel
- Finger circumference gauge
- Functional finger motion gauge

SET 3

Reference code	Description: Grip / Pinch	Warranty	Unit
12-O117	90 kg (200 lb) (12-O221) / 13 kg (30 lb) (12-O200) HD [®]	HD [®] 5 year warranty	Set

3-piece hand sets

- Protective carrying case stores instruments
- 3 different sets based on the **warranty of your choice**:

1. LITE[®] SET (12-O101)

This set contains the following components:

- **Hydraulic hand grip dynamometer LiTE[®] | Red finish | 1 year warranty (12-O241)**
- Hydraulic pinch gauge | 23 kg (50 lb) | LiTE[®] | Red finish | 1 year warranty (12-O226)
- 15 cm (6") stainless steel goniometer

Reference code	Description Grip / Pinch	Warranty	Unit
12-O101	90 kg (200 lb) (12-O241) / 23 kg (50 lb) (12-O226) LiTE [®]	LiTE [®] 1 year warranty	Set

SET 1

2. STANDARD SET (12-O103)

This set contains the following components:

- **Hydraulic hand grip dynamometer Standard | Blue finish | 2 year warranty (12-O240)**
- Hydraulic pinch gauge | 23 kg (50 lb) | Standard | Blue finish | 2 year warranty (12-O235)
- 15 cm (6") stainless steel goniometer

Reference code	Description Grip / Pinch	Warranty	Unit
12-O103	90 kg (200 lb) (12-O240) / 23 kg (50 lb) (12-O235) Standard	Standard 2 year warranty	Set

SET 2

3. HD[®] SET (12-O116)

This set contains the following components:

- **Hydraulic hand grip dynamometer HD[®] | Black finish | 5 year warranty (12-O221)**
- Hydraulic pinch gauge | 23 kg (50 lb) | HD[®] | Black finish | 5 year warranty (12-O222)
- 15 cm (6") stainless steel goniometer

Reference code	Description Grip / Pinch	Warranty	Unit
12-O116	90 kg (200 lb) (12-O221) / 23 kg (50 lb) (12-O222) HD [®]	HD [®] 5 year warranty	Set

SET 3

Push-pull dynamometer

MDCE

- Lightweight, small, and portable; easy to grasp with or without handles
- Use for muscle strength management, job task analysis, or functional capacity evaluation
- Comes with 3 push pads and 2 pull hooks
- **2 years warranty**

Reference code	Description	Unit
12-O393	Hydraulic - analog (45 kg / 100 lb)	1 pc
12-O389	Dual Grip for push-pull dynamometer	1 pc

HYDRAULIC

DUAL GRIP

Back-leg-chest dynamometer

MDCE

- Measures strength of back, leg, and chest muscles
- Base provides secure footing
- Adjustable chain to accommodate for height differences or to vary the point of force application
- Comes fully assembled with 1,5 m (5-foot) chain
- Oversize base 60 x 60 cm (24" x 24"); regular base 45 x 45 cm (18" x 18")
- Pointer remains at maximum until reset
- Reads kg and lb

Reference code	Description	Unit
12-O400	Adult with standard base, 300 kg (660 lb)	1 pc

Finger (digit) goniometers

MDCE

- Measures 110° flexion through 40° hyperextension in 2° increments on plastic model (5° increments on metal model)
- Arm has 10 cm (4") linear scale
- Use one finger to move the measurement head through flexion, extension, and hyperextension
- **Readings can be taken using only one hand;** freeing the therapist's other hand to stabilize the patient during measurement or to record the measurement. Standard finger goniometers require two hands to take a finger ROM measurement

Reference code	Description	Unit
12-1014	Plastic digit goniometer	1 pc
12-1016	Stainless steel digit goniometer	1 pc

Plastic finger goniometer

MD CE

- Scale reads in 1 degree increments; linear scale reads in cm and inches
- Measures flexion to hyper-extension

Reference code	Description	Unit
12-1012	Flexion to Hyper-Extension Finger Goniometer	1 pc
(old reference: O8-O3O6O1)		

180° 20 cm goniometer

MD CE

- Two opposing scales marked in 1° increments
- Tension between the arms is controlled by the thumb knob
- Stainless steel

Reference code	Description	Unit
12-1040	20 cm (8"), 180°	1 pc

180° 35 cm goniometer

MD CE

- Two opposing scales marked in 1° increments
- Extra-long arms for measuring all joints
- Stainless steel

Reference code	Description	Unit
12-1041	35 cm (14"), 180°	1 pc

360° 35 cm goniometer

MD CE

- Two opposing 180° scales and one 360° scale, all marked in 1° increments
- Arm tension is controlled by the thumb knob
- Stainless steel

Reference code	Description	Unit
12-1050	35 cm (14"), 360°	1 pc

180° finger (small joint) goniometer

MD CE

- Stainless steel goniometer measures ROM of finger joints (metacarpophalangeal and interphalangeal) and other small joints including toes
- Head has opposing 150° scales in 5° increments
- Linear scale in cm and inches

Reference code	Description	Unit
12-1010	Standard finger, 15 cm (6")	1 pc
12-1015	Small finger, 9 cm (3,5")	1 pc

SMALL FINGER

STANDARD FINGER

6-piece goniometer set

MD CE

- 6 goniometers in a padded carrying case
- 15 cm (6") 180° Robinson pocket
- 35 cm (14") 180° stainless steel
- 35 cm (14") 360° stainless steel
- 15 cm (6") stainless steel finger
- 20 cm (8") 180° x-ray
- 20 cm (8") 180° stainless steel

Reference code	Description	Unit
12-1043	Goniometer set	Set

XTender® extendable goniometer

MD CE

- Arms extend to measure large and small joints
- Extendable arms allow the goniometer to lie over anatomical bony landmarks
- Head is the same as a traditional goniometer for easy use
- Metal legs extend from 25 cm (10") to 90 cm (36")

ARMS COLLAPSED

ARMS EXTENDED

Reference code	Description	Unit
12-1034HR	XTender® extendable goniometer	1 pc

Lafayette goniometer MD CE

A goniometer is a useful tool to assess the range of motion of the joints. The Lafayette Goniometer has extendable arms, which allows it to lie over anatomical bony landmarks. This results in the ability to measure all joints, no matter how big or small. The goniometer also has a magnifying lens to read the double 180 degree scale.

Reference code	Description	Unit
12-1O35 (old reference: O8-O3O7O1)	Lafayette Gollehan Extendable Goniometer with Magnifying Lens 24 x 26 cm 180°	1 pc

Plastic goniometers MD CE

- Scale reads in 1 degree increments; linear scale reads in cm and inches
- Hi-Res[®] option has white background behind the gradations and numbers for enhanced readability
- Take readings from absolute vertical or horizontal with the Absolute+Axis[®] goniometer

CLINIC - 15 CM PLASTIC ISOM (BOTTOM RIGHT)
CLINIC - 20 CM PLASTIC ISOM (BOTTOM LEFT)
CLINIC - 30 CM PLASTIC ISOM (TOP)

PATIENT - 15 CM POCKET

30 CM ISOM ABSOLUTE+AXIS[®] (12-1O25)

30 CM ISOM ABSOLUTE+AXIS[®] HI-RES[®]
(INTEGRATED INTO GONIOMETER) (12-1O25HR)

ABSOLUTE+AXIS[®] ATTACHMENT SLIDES ONTO
ANY 30 CM GONIOMETER

Reference code	Description	Unit
Clinic - plastic ISOM		
12-1O0OHR	30 cm (12") ISOM Hi-Res [®] 360°	1 pc
12-1O01HR	20 cm (8") ISOM Hi-Res [®] 360°	1 pc
12-1O02HR	15 cm (6") ISOM Hi-Res [®] 360°	1 pc
Patient - plastic pocket		
12-1O05HR	15 cm (6") pocket Hi-Res [®] 180°	1 pc
Plastic sets		
12-1O28HR	Hi-Res [®] set - 6 pieces	Set

12-1O25HR	30 cm (12") Absolute+Axis [®] Hi-Res [®]	1 pc
12-1O26	AA attachment only	1 pc

Digital goniometer

MD CE

- Digital plastic goniometer. Reads 0-360° on a LCD screen; 25 cm linear scale

Reference code	Description	Unit
12-1049	25 cm (10") plastic 360°	1 pc

Touch-Test® 2-point discriminator

MD CE

- Tests static, **moving** 2-point discrimination
- Consists of two sturdy, rotating, plastic discs that are joined together
- Includes instructions and carrying case

Reference code	Description	Unit
12-1495	Touch Test® 2-point	1 pc

Discrim-A-Gon® 2-point discriminator

MD CE

- Easy-to-use, lightweight plastic wheel is the perfect sensory evaluation tool to test static and dynamic 1 and 2-point discrimination
- 2 separate 2-point discrimination octagons (D1 and D2) come in a set
- Each octagon measures a different range of 8 labeled, **fixed**, 2-point intervals ranging from 1 to 25mm

Reference code	Description	Unit
12-1492	Discrim-A-Gon® set (2 discs)	Set

D1

D2

2-point discriminators

MD CE

- Evaluate cutaneous sensitivity and touch threshold
- Third point permits alternating between single and double point stimulation without changing setting
- Plastic points minimize influence of temperature
- Measures up to 4 cm

Reference code	Description	Unit
12-1480	2-point discriminator	1 pc
12-1481	with third point	1 pc

Sit 'n Reach® box test

MD CE

- Perform sit 'n reach® flexibility tests
- Measurements include: fitness program, Cooper Institute/YMCA, SHAPE America (formally known as AAHPERD)
- Scales printed in cm and inches
- Sturdy metal construction with a built-in foot plate and a maximum stretch indicator that remains until reset

Reference code	Description	Unit
12-1085	Standard Sit 'n Reach® box test	1 pc

Finger flexion gauge

MD CE

- Clear plastic gauge simplifies and speeds measurement of composite finger flexion and finger-thumb opposition
- Scale measures up to 10 cm

Reference code	Description	Unit
12-1060	Finger flexion gauge	1 pc

Gulick measurement tape

MD CE

- Spring exerts constant force on tape for accurate and repeatable results
- Push-button retractor
- Reads in cm and inches

Reference code	Description	Unit
12-1201	150 cm tape	1 pc
12-1203	180 cm tape	1 pc

Finger circumference gauge

MD CE

- Wrap webbing around finger or digit and read circumference in both cm and inches

Reference code	Description	Unit
12-1222	Gauge (in/cm)	1 pc

Circumference tape

MD CE

- Measure the circumference of a body part in both cm and inches

Reference code	Description	Unit
12-1205	Tape	1 pc

Clinical monofilament sensory evaluators

The Baseline Monofilament evaluator is used to measure cutaneous sensory perception threshold. It measures sensitivity, nerve damage or impairment, and changes in neurological status. Each monofilament represents a unique amount of force which is marked by force and size.

1. TACTILE™ MONOFILAMENTS

These monofilaments have a fitted protective case that enables safe storage and transport.

Reference code	Description
12-1660 (old reference: O8-O5O421)	2-piece set, normal 2,83 - 3,61
12-1668 (old reference: O8-O5O425)	2-piece set, protective sensation 4,56 - 5,07

2. FOLD-UP™ MONOFILAMENTS

These monofilaments feature an easy to fold nylon filament for protection as well as easy storage and portability. Sets are shipped and stored in a soft-shell protective carrying case.

Reference code	Description
12-1740	5-piece set, hand 2,83 - 3,61 - 4,31 - 4,56 - 6,65
12-1741	6-piece set, foot 2,83 - 3,61 - 4,31 - 4,56 - 5,07 - 6,65
12-1743	20-piece set, complete

20-PIECE SET:				
COLOUR	USE	QUANTITY	SIZE	FORCE
●	Normal	1 pc	1,65	(0,008 gm)

3. DISPOSABLE MONOFILAMENTS

These are individual 5,07 / 10 gm monofilaments that are disposable, making them ideal for clinics and other multi-patient environments

Reference code	Description	Unit
12-1670	Baseline Tactile Monofilament LEAP Program Disposable	1 pc
12-1670-20	Baseline Tactile Monofilament LEAP Program Disposable	20 pcs
12-1670-40	Baseline Tactile Monofilament LEAP Program Disposable	40 pcs

Tuning forks

MD C E

- Use to evaluate audio and vibratory sensation

Reference code	Description	Unit
Set of six pieces with case		
12-1460	128, 256, 512, 1024, 2048, 4096 cps	6 pcs
Weighted tuning forks		
12-1466	128 cps weighted	1 pc
12-1467	256 cps weighted	1 pc
Unweighted tuning forks		
12-1468	512 cps	1 pc

Pinwheel

MD C E

- Test for nerve damage or nerve dysfunction with the **Baseline® Clearwheel®**
- Used by orthopedists, neurologists, chiropractors and other healthcare practitioners to test a patient's ability to feel sharp contact with the skin
- Consists of a rotating pinwheel attached to a handle

Reference code	Description	Unit
12-1446	Non-sterile Clearwheel®	1 pc

Bubble® inclinometer

MD C E

- Place the inclinometer near the joint to measure, turn dial until scale reads 0, take joint through its range, read range from dial
- Some measurements need the use of 2 inclinometers
- Standards codified in "AMA Guide to the Evaluation of Permanent Impairment, third edition"

Reference code	Description	Unit
12-1056	Bubble® inclinometer	1 pc

AcuAngle[®] inclinometers

MD CE

- Place inclinometer near joint to be measured; turn dial to 0; take joint through its range; read ROM from dial
- AcuAngle[®] Inclinometer** has adjustable feet along scale (side-to-side) that adapts to body contours; Pointer is damped by fluid to assure accurate ROM measurements
- AcuAngle[®] Wrist Inclinometer** measures ROM of the wrist along all axes; distance between feet is adjustable

Reference code	Description	Unit
12-1149	AcuAngle [®] inclinometer	1 pc
12-0502	AcuAngle [®] wrist inclinometer	1 pc

ACUANGLE[®] WRIST INCLINOMETER

ACUANGLE[®] INCLINOMETER

Digital inclinometer

MD CE

- Place inclinometer near the joint to be measured; press "zero" button; move joint through its range; press the "hold" button
- Read ROM directly after the joint has been taken through its range

Reference code	Description	Unit
12-1057	Digital inclinometer	1 pc

Scoliometer

MD CE

- Measure the degree of rotation of a deformity on the back
- Small, non-invasive
- 19 cm (7,5") L x 9 cm (3,5") W
- Includes storage pouch

Reference code	Description	Unit
12-1099	Scoliometer	1 pc

Economy skinfold caliper

MD CE

- Plastic** skinfold caliper is the inexpensive choice for skinfold analysis
- Spring-loaded arm assures reproducible results
- Floating tips assure accurate and reproducible results
- 50 mm scale
- With booklet and tables

Reference code	Description	Unit
12-1112	Economy skinfold caliper	1 pc

WITH FLOATING MEASUREMENT TIPS

Skinfold calipers

MD

CE

- 2-sided lightweight **aluminum** caliper is easy to use and read for left- or right-handed people; includes calibration block
- Floating tips to assure accurate and reproducible results
- Large, easy-to-read 70 mm scale
- Includes protective carrying case
- Calibration block verifies at 5-50 mm
- Easily fits into your pocket

DOUBLE SIDED CALIPER - FRONT

DOUBLE SIDED CALIPER - BACK

CALIBRATION BLOCK

SINGLE SIDED CALIPER

Reference code	Description	Unit
12-1130	Deluxe (dual sided) with calibration block	1 pc + block
12-1110	Skinfold caliper (single sided) without calibration block	1 pc

BMI Body Fat Scale

MD

CE

- Made with tempered glass
- Measures weight, body fat and water %
- Measurements range from 4% to 60% body fat; 27.5% to 66% hydration; 20% to 56% muscle; 2% to 20% bone
- Percentages are measured in 0.1% increments
- 12-person memory
- 32 cm (12.5") L x 31 cm (12.25") W x 5 cm (2") H
- Weight capacity is 400 lb / 180 kg
- Requires 2 AAA batteries (included)

Reference code	Description	Unit
12-1190 (old reference: 08-070101)	BMI Body Fat Scale	1 pc

Private label

Do you want to work together?

You like our products, but you would like your own brand or your customer’s name on one or more of them? **Let’s work together!**

In close collaboration with our manufacturers from all the products in our range, we can create your desired product with the exact look you want. We can **replace our logo with yours, change the colour, even the packaging** can be tweaked to your needs and liking. Private labels will allow you to design the product the way you want to match it to your company’s or customer’s identity.

Private Label products are identical in quality as all our products, with the benefit of putting **your brand in the spotlights**. Looking for the perfect solution to a homogeneous range of products? Want to increase your brand awareness? Need a one time opportunity, such as a promotional product? We’ll take care of it.

Please **contact us** for more information about pricing and volume.

After-sales

MVS In Motion calibration service

Measurement Instruments are calibrated at manufacturing with a full one year guarantee, before sending them to users all over the world. Ideally, these instruments should be recalibrated every year.

In order to make this happen in an easy and inexpensive way, Hydraulic Hand Dynamometers (Saehan, Baseline, ...) and Hydraulic Pinch Gauges are recalibrated by our experts at the MVS In Motion Centre in Roeselare - Belgium. This operation consists of re-establishing the exact relationship between the force applied to a dynamometer and the measurement it shows. Small repairs can be done as well.

Simply send your request to our customer service department for a return authorisation. After each recalibration, you will receive an updated calibration certificate, certifying accurate and repeatable test results.

If you have many calibrations to do, you might consider buying your own calibration unit.

MVS In Motion repair centre

Since machines are designed and assembled by humans, they are not flawless. That is why MVS In Motion installed an inhouse repair centre, to swiftly and correctly solve any problems that may occur with our products.

No matter the cause, be it faulty fabrication or misuse, our technician will shine his light on the problem.

Send an email to our customer service department to inform us on the type of problem and the serial number / production date of the device. After our authorisation, please send over the patient, accompanied by your name and client number and a brief description of the symptoms to aftersales@mvs-in-motion.com. We'll do our best to have it **cured in no time!**

Terms & Conditions

Article 1. Company details

These sales conditions apply to all current and future agreements with MVS IN MOTION BV, with registered office at 8800 Roeselare, Krommebeekpark 11 and registered with the RPR Gent, Division Kortrijk under number O458.496.729 (hereinafter referred to as "MVS"), as well as with any company affiliated to MVS in accordance with Article 120 of the Companies and Associations Code.

Article 2. Applicability

These conditions are applicable to all offers, all agreements, all purchases and orders, both made in MVS's office and online, by e-mail or any other medium (hereinafter generally referred to as "Agreement(s)"). As soon as the customer (hereinafter referred to as "Customer(s)") enters into an Agreement with MVS, it accepts the general conditions as described in this document to the exclusion of the application of any of its own general conditions, even if these contain the same grounds for exclusion. The General Terms and Conditions are applicable to all products and services offered by MVS, except in the case of an explicit deviation which is the result of mutual agreement and written confirmation. Explicit deviations shall only be valid as a replacement or an addition to the clauses to which they relate. The other provisions of these general terms and conditions shall continue to apply in full. If a provision contained in these general terms and conditions is contrary to an international treaty, insofar as it is applicable, a law, regulation or other mandatory regulation, the provision in question shall not apply. The invalidity of a provision shall not affect the validity of the remaining provisions of the general conditions, which shall continue to apply in full. MVS reserves the right to change and/or to supplement the general conditions at any time. An amendment of these general conditions shall have no effect on already existing Agreements. Any matters not explicitly provided for in these general terms and conditions of sale shall be governed by the provisions of Belgian law.

Article 3. Conclusion of the Agreement

Anyone placing an order confirms that they are commercially competent. Commercially incompetent persons shall be represented by their legal representative, who shall also be bound by these general conditions. MVS undertakes to process orders as long as stocks last and within the limits specified in these general conditions. The order can only be processed when the Customer has clearly identified himself. The placing of an order shall constitute acceptance of these general sales conditions. Placing an order entails an obligation to pay. The general conditions are always available and can be consulted on the website. MVS reserves the right to refuse orders in case of serious suspicion of abuse of rights or bad faith, serious suspicion of commercial purposes unacceptable to MVS or in case of exhaustion of stock of a certain article. For each order, the general terms and conditions that are included on the website and/or on the invoice are applicable. The language of the Agreements concluded is English. An order is only final after acceptance of these general terms and conditions, the prices and the description of the offer. If anything is unclear in the offer or after ordering, the Customer can always contact us, either via info@mvs-in-motion.com or by telephone between 9 a.m. and 5 p.m. on +32 51 50 55 01.

Article 4. Signature and proof

The Customer accepts electronic evidence. The Customer is solely responsible for the accuracy of all the data he or she transmits. The final confirmation of the order by the Customer is deemed to be acceptance of the order at the price set.

Article 5. Prices and Payment

The prices are ex works Roeselare (EXW), Belgium. All prices of products are indicated in Euros and are exclusive of VAT. Shipping costs, transport costs, bank charges, delivery costs, taxes and other levies are not included in MVS' prices and will be paid by the Customer, unless otherwise agreed in writing. For orders with an order value of less than 250 € an administrative cost of 10 € will be added. The Customer owes MVS the price that was indicated in the confirmation of the delivery note. Obvious errors in the price quote, such as evident inaccuracies, can be corrected by MVS even after the conclusion of the agreement. All offers made by MVS are free of obligation. MVS can change prices at any time without prior notification. In the absence of timely or full payment, default interest of twelve percent (12%) per year will be owed, ipso jure and without notice of default, from the due date of the invoice until the day of full payment. In the event of non-payment, late payment or full payment, a fixed compensation amounting to 15% of the invoice amount, costs included, with a minimum of EUR 40 will also be payable. In case of non-timely payment of an invoice, all other claims of the Customer that have not yet fallen due will become immediately due by operation of law. With non-payment, MVS reserves the right not to deliver the products. MVS also reserves the right to regard the sales agreement as dissolved by operation of law and without prior notice of default, for the whole or the part not yet executed.

Article 6. Delivery of the Order

Products will only be delivered in the countries for which MVS allows delivery. The chosen delivery option influences the delivery period. The stated delivery times are not binding, but are given merely as an indication. Incorrectly communicated delivery addresses are the responsibility of the Customer and may result in additional costs. MVS is entitled to make partial deliveries. The Customer is responsible for all additional taxes and duties. MVS cannot be held responsible for any fees charged by a third party. The delivery will be at the risk of the Customer. No delay in delivery can lead to the termination of the agreement, except in case of deliberate delay. MVS commits to pack the products to be delivered as carefully as possible in order to exclude the possibility of damage during normal handling. MVS accepts no responsibility for late deliveries due to unforeseen circumstances caused by third parties, nor for loss, theft or damage during shipment by third parties and, insofar as permitted by law, MVS shall also not be liable for losses, costs, liability, damages, fines or expenses caused by a delay or failure to deliver due to unforeseen circumstances caused by third parties, nor for loss, theft or damage during shipment by third parties.

Article 7. Reservation of Ownership

The ownership of products will only be transferred to the Customer after full payment of all sums due by the Customer to MVS, including payment of the agreed price, costs, interest and possible damages. Until the actual transfer of ownership, the Customer is prohibited from reselling, renting out, pledging, processing, incorporating or in any other way disposing of or encumbering the products until all payments and obligations have been fully settled, unless otherwise agreed by MVS. Nevertheless, the Customer shall bear the risk of loss or destruction of the Products from the moment of delivery.

Article 8. Force Majeure

MVS will not be responsible for delays in the fulfilment or non-fulfilment of its commitments due to events beyond its normal control, including production interruptions, difficulties in acquiring or shortages of raw materials, work force, energy or transport or delays in transport, strikes, epidemics, pandemics, lock-outs, work interruptions or other collective labour disputes, which affect either MVS or its suppliers, disruptions in the internet, the electricity network, mail traffic or technology provided by third parties, government measures and illness, even if these events are foreseeable.

Article 9. Intellectual Property Rights

All intellectual property rights and derived rights are retained by MVS. These intellectual property rights include copyrights, trademark rights, drawing and model rights and/or other (intellectual property) rights, including patentable or non-patentable technical and/or commercial know-how, methods and concepts. The contents of the website, images, logos, drawings, photos, data, product names, texts, etc. are protected by copyright and other (intellectual) property rights and treaty provisions, which exclusively belong to MVS. The photographic work of MVS is subject to copyrights, which are exclusively retained by MVS. For use for commercial purposes, the Customer must request permission and/or pay a fee to MVS.

Article 10. Processing of Customer Data and Privacy

When products are purchased, the Customer explicitly agrees that his or her personal data can be used and processed for administrative purposes, such as keeping track of orders in a customer database or for billing purposes. The information provided by the Customer is necessary for the processing and completion of orders and invoicing. If these data are missing, the order will inevitably be cancelled. Personal data will only be processed for promotional purposes, personal advertising and/or other (re)marketing purposes if the Customer has given his/her consent. MVS will never pass on this personal information to third parties, unless with the Customer's consent or when explicitly requested by judicial authorities or when it is legally obliged to do so. The Customer has the right to modify or review his or her personal information at any time. The Customer also has the right to oppose, free of charge, the processing of his personal data for direct marketing initiatives. Only Customers who have given their express consent to this will be included in MVS's newsletter. Unsubscribing is possible upon simple request of the Customer. Should the Customer wish to contact MVS with regard to the processing of his or her personal data, a message should be sent to the following e-mail address: info@mvs-in-motion.com

Article 11. Defects and complaints

The Customer undertakes to examine the products thoroughly immediately upon receipt. MVS' warranty is limited to the warranty for hidden defects and the warranty in the case of consumer purchases, both as specified in the Civil Code. MVS is only responsible for damages which are the result of intent or gross error. MVS is not responsible for general or special indirect damages of any kind suffered by the Customer nor for damages to goods, visible at delivery, which are not mentioned on the carrier's consignment note. MVS shall also not be responsible for any postponement or cancellation of a production that is due to late delivery by the Customer or its subcontractor of a product or accessory, or to the punctuality or faulty conduct of the latter. Complaints must reach MVS in order to be admissible: (a) in the case of complaints due to non-conformity of the delivery, seven (7) days after delivery and (b) in the case of hidden defects, seven (7) days after discovery of the defect or after the moment by which such discovery could reasonably have taken place. The acceptance of the goods by the Customer covers any possible defect or non-conformity which could have been discovered at that time. MVS undertakes to answer the complaint within a period of 14 calendar days after written receipt. Reimbursement or exchange are only possible after explicit agreement by MVS. Prior to the return of the products, the Customer will provide MVS with a detailed inventory of the products that will be returned (cfr Complaint Form) as well as any other information that MVS may require, including but not limited to the batch number, the production date or the expiry date. Under no circumstances will returns of more than 30 days after delivery be accepted, nor will returns be accepted for products that are damaged, used or not in their original and unopened packaging. In the event of a return, MVS may charge the Customer a processing fee of ten percent (10%) of the purchase price (costs and taxes included).

Article 12. Applicable law and competent court

All offers and Agreements are governed exclusively by Belgian law. In the event of disputes, the courts of the judicial district of Gent shall have jurisdiction. Within the framework of their relations, the parties concerned accept electronic evidence.
